For more than 25 years, the Water-Taxis offer an excellent service to the visitors of Spetses , from the Kosta (coast of Peloponnese) to the island, and from the main port of Spetses to various destinations.

The main advantages are the speed in traveling, the immediate ability of service and their reliability. In addition, they are available 24 hours long!

It takes only a phone call to the Main rank, to get a ride from wherever you are to wherever a water-taxi can approach!

Moreover, by hiring a water-taxi, you may reach Spetses from Porto Heli, Hermioni or even the close island of Hydra!

The fare is relevant to the destination, and the full pricelist is available at a stand, next to the Water-Taxis rank, at the main port of Spetses .

The water taxis are small speed-boats , with a capacity of 8 people.

Their shape is ideal for safe and reliable trips even at a very bad weather, and they guarantee the constant sea-transportation between Spetses and the Mainland.
